Environmentally Responsible + Owned and Manufactured in the U.S.A.

The Power of "Blue"

- The same GREAT formula for 22 years
- PristineBlue has no chemical taste or odor.
- PristineBlue maintenance is only once every 2 weeks.
- PristineBlue is gentle to equipment, skin, hair and eyes.
- PristineBlue backwash will not harm your grass.
- PristineBlue is made in the U.S.A.
- PristineBlue is economical.

PristineBlue water just feels like water!

Thousands of residential pool owners rely on **PristineBlue**® for comfortable, clean, clear water.

- Water treated with **PristineBlue**® feels softer and looks inviting without a chemical taste or odor.
- It's gentle to equipment and it won't bleach your liner or swimsuit.
- You can swim immediately after application.
- Your eyes won't burn.
- You won't believe how good your skin and hair feel after swimming.
- Over the course of a swim season, **PristineBlue**® costs about the same or less than chlorine.

Put **PristineBlue**® in your water and forget about it. You've got better things to do with your free time than worry, on a daily basis, about the condition and appearance of your swimming pool. The long-lasting formula of **PristineBlue**® lets you escape the chore of daily water testing and maintenance. With **PristineBlue**®, you'll follow the simple maintenance program prescribed by your dealer just once every 2 weeks*.

PristineBlue® is perhaps the most cost-effective way to treat your pool because every drop of **PristineBlue**® goes to work controlling algae and nonpublic health bacteria. **PristineBlue**® does not evaporate or degrade in sunlight. Its levels are reduced only as it works against algae and bacteria in your water.

*Weekly shocking may be beneficial in certain climates.

Small Start Up Kit

Treats up to 16,000 gallons of water.

Starting your pool on **PristineBlue**® is easy! You'll find everything you need to start your chlorine pool on **PristineBlue**® in one of our Start Up Kits.

Large Start Up Kit

Treats up to 32,000 gallons of water.
